Whitepaper V1

INTRODUCTION

The Bogeyman is widely regarded as an imaginary mythical creature that is often used by the grown up to scare kids into compliance. Make no mistake, Bogey is truly here to storm the meme crypto space to break records and set high standards.

The mission is simple; creating a viable community wherein, members get to have unending fun while earning profits as a reward for being loyal to the Bogey. There have been numerous meme tokens in the crypto space with tremendous success achieved, the Bogey has set out to break the achievement records set by those other meme tokens, through a well-planned roadmap consisting of innovative utility products, effective marketing and developmental plans that is guided by highly experienced dev team.

Bogey project has being carefully designed to be community driven. Therefore, built on the BSC chain to give affordability of transaction fees to the community members and giving equal opportunity to different class of people to be able to buy the \$BOGEY token.

The Bogey tokenomics has been set up to ultimately see to the success of the Bogey project, as tax fee has been partitioned into aiding constant effective marketing, constant development, and rewarding the token holders. To ensure maximum security and build trust, the contract ownership has been renounced.

DECENTRALIZED BOGEY

Cryptocurrency as a technology was introduced to be the exact opposite of existing flaws within the centralized systems of the different aspects of our lives such as the Financial institution, Governments, Educational institutions, Technology, Health sector, etc. In this regard, the Bogey is built to function, and to further take decentralization to the next level. .

Bogey has been designed to be fully decentralized, as Devs has renounced contract ownership, to ultimately solidify trust within the community, which they themselves are also members. Every community member will have equal power in the project and able to make key decisions, **being a community owned project gives us tremendous power and the potential to being the next big meme token.**

Unlike other projects out there, Bogey is fully decentralized!

OUR MISSION

We believe that, through the power of collective decentralization we can build something stronger than a centralized team ever could create. A community-run token is nothing without the united individuals who give it purpose.

From the early days of Bogey, we shall be known as the Bogey Army. For many, it will become part of their identity. whether you are a new recruit or part of the old guard, if you fly under the Bogey Army banner, you must embrace our founding principles:

1. We build from zero, with zero. It's the spirit of our project to create something out of nothing.
2. Every member must contribute to the project in one way or the other.
3. It is always Bogey first before any other.
4. All members are equal.
5. We love Bogey and must care for the project.

Being able to build a community meme project out of nothing, by collective like-minded individuals from all over the world, contributing their various skills to ultimately bring about success, this is the task our army will be taking head on. We invite the following category of people into the Bogey community: Shillers, Meme creators, Moderators, promoters, marketers, developers, investors etc.

Our future can be in our hands as a community, not in the hands of a few who call themselves Dev Team.

WHY BSC

If you are wondering why founder has chosen Binance Smart Chain as the preferred Blockchain upon which Bogey is built, the answer is straight forward and easily comprehensible.

Binance Smart Chain is a secure network with established features that gives us the opportunity for further growth and development in future, this allows for easy integrations and developments in future.

Binance network has very cheap transaction fees that makes it the perfect blockchain for the people, not everyone is rich and many people are new into the crypto space. By having affordable transaction fees in Bogey, opportunity is being afforded everyone of different financial class.

Binance Smart Chain is one of the safest networks and most used in the world, accessible to everyone all over the world through the easy to use products such as the binance app, and this chain has many 3rd party DApps available for use for different reasons, will be quite useful for our future.

PARTNERSHIP & MARKETING

Although the Bogey project will be relying heavily on community activeness and promotion efforts, our founders have made some partnership deals with big names in the crypto space, to try to create much needed awareness for the project. The success of any crypto project comes down to how well it is known by crypto investors and none investors alike.

These partnership deals and marketing activities will be made to complement community efforts and ultimately get very positive results. At the early stage of the project, we will be partnered with at least 100 Asian Kols, 20 Twitter influencers, 20 youtubers, AMA channels and spaces on twitter, and many promoters.

Partnership deals and marketing will be done at all stages of the project to maintain upward growth and development.

Within the community, we will be having a great number of influencers, marketers, promoters and shillers who will be working voluntarily for the success of the project. also the founder will be making paid marketing as mentioned above, in a bid to get very close to the standards set by our mentor projects, the Doge and the Shiba.

\$BOGEY Token

\$BOGEY Token is the native token of the Bogey Ecosystem and it is built on the Binance Smart Chain. It is the currency with which all transactions and interactions will be made in the Bogey Ecosystem.

Being 100% a community token, ownership of the token contract has been renounced and all power given to the community to contribute greatly to its success through the might of the Bogey Army.

Ownership renouncing means that Founders do not have any access to modifying the contract or making malicious moves with the contract functions. Bogey is a 100% decentralized community token.
